Some planned measures

- **Restrictions on the traffic lane** - because it reduces speed and makes everyone more aware
- Parking spots dedicated to **deliveries** and **service vehicles** - because the practical jobs have to be done
- **Expansion of sidewalks** - because it allows room for us to walk in and use in the street
- More **bike racks and lanes** - because it will make it more convenient and safe to ride a bike in everyday life
- **Better lighting** - because good lightning makes areas feel more secure
- More **installations** from artists - because we like to be surprised
- More **outdoor seating** - because we like the sun and fresh air
- More **flowers** - because we want a greener city
- **E-benches and outdoor office space** - because sometimes we get tired of sitting inside
