

Big Buyers Working Together Annual Event

*Public Buyers driving a more sustainable, social and
innovative Europe*

24-25 March 2024, Helsinki, Finland

About the project

[Big Buyers Working Together \(BBWT\)](#) is a European Commission project, launched in March 2023, to support collaboration between public buyers with strong purchasing power and promote the wider use of strategic public procurement for innovative and sustainable solutions.

The project strongly believes that by working together and pooling their resources, cities, central purchasing bodies, and other major public buyers can maximise their market power and impact. Ten Communities of Practice (CoPs) were created in the framework of this project, allowing public buyers to explore different sectors, such as zero emission construction sites, heavy-duty electric vehicles, circular construction, sustainable solar panels, mobility, digital, socially responsible public procurement, the New European Bauhaus, healthcare efficiency and sustainability.

The annual event aims at bringing CoP members and relevant stakeholders together to connect on the work of the past year and to propose discussions on where strategic public procurement in Europe is heading. The event will facilitate collaboration and interactions among members from different CoPs and it will give the possibility of sharing challenges and good practice. It will also allow individual CoPs meetings to continue the momentum amongst each group.

Agenda
